- 4. Body
- 5. Switch
- 6. Base

Care & Cleaning Instructions

Always disconnect the kettle from the main supply when cleaning.

A. Cleaning the kettle

Scaling or furring up is a common problem, a water purifier and periodic cleaning will always be recommended.

- Scaling will damage the function of the heating element and impair the function of the dry boil protector.
- a. To clean the inside of the kettle, please fill the kettle with water, then add 2ml of white vinegar and let the mixture boil.
- b. Unplug the unit and empty the kettle.
- c. Re-clean at least three times with water to remove the particles.

B. Cleaning the filter

- a. Take out and place the filter under a tap and rub gently with your fingers. Be careful not to use anything that will tear the filter when cleaning
- b. Dip in a proprietary descaling agent and rub gently then rinse.
- c. Descale your filter at regular intervals in order not to impair the pouring performance of your kettle.
